Team 10: Accessing Code Repository

Project Title: Rhythm

Team Members: Indhu Meena Ramanathan, Richard Hansen, Steven Dellamore, Columbus Holt

Our code will be hosted will be hosted on GitHub as a private repository. The private GitHub repo will be shared with our project coordinator so that he would be able to access our code and documentation. He will also be able to clone our repository. If the code needs to be accessed by others, we can share it with them too. Our repository will house the Project Charter, Product Backlog, and any other future documentations. The documentations will be timely updated throughout the semester and we will keep the documentations easy to locate in our repository.
